Furniture Prices Take ANOTHER Advance

Two weeks ago when we made our first announcement of a big increase in wholesale furniture prices (of from 10 per cent to 20 per cent) the Industrial Control bill to increase wages, had no been passed by congress.

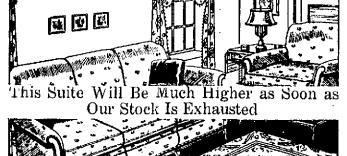

Since that time furniture maker find they will soon be forced t double or even trebble the wages of their employers. This will mean another 20 per cent to 25 per cent increase in furniture prices, not even counting the fact that prices of raw materials are going up every week, besides. These wage increases would enable furniture workers to buy more of our cotton and produce, and would be beneficial to us all.

We have unpacked several new bed rom, living room and dining room suites, which were bought by u just before the first increase prices. Many thrifty families have taken advantage of the exceptional valeus, and new styles we are now offering. As soon as our presen stock is exhausted, prices may in crease half or more, from present indications.

Furniture Prices Take ANOTHER Advance

Two weeks ago when we made our first announcement of a big increase in wholesale furniture prices (of from 10 per cent to 20 per cent) the Industrial Control bill to increase wages, had no been passed by congress.

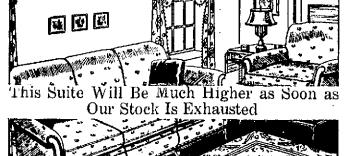

Since that time furniture maker find they will soon be forced t double or even trebble the wages of their employers. This will mean another 20 per cent to 25 per cent increase in furniture prices, not even counting the fact that prices of raw materials are going up every week, besides. These wage increases would enable furniture workers to buy more of our cotton and produce, and would be beneficial to us all.

We have unpacked several new bed rom, living room and dining room suites, which were bought by u just before the first increase prices. Many thrifty families have taken advantage of the exceptional valeus, and new styles we are now offering. As soon as our presen stock is exhausted, prices may in crease half or more, from present indications.
